

We, the students of the Europeaness Erasmus+ project, declare that the following demands on European cooperation are vital for the Europe we want to live in:

Climate Change

We demand more help to develop sustainable projects, stricter rules regarding the emission of global warming gases and sanctions for countries which don't follow or won't reach Paris agreements goals.

We demand also that European citizens are provided with more information on how they could reduce household wastes. Our future is really important and we have to protect our planet by any means.

Communication

We demand that all European citizens should have free access to the information concerning the EU and the member states which they need to assess their interests and to form their own opinions and develop their critical thinking.

We demand that people are better informed so that they know how EU regulations and laws affect them and what benefits they receive from the EU.

We demand that people in Europe are being listened to and given a say in how their future is going to be shaped. There must be openness to all opinions and every point of view must be respected.

More efforts should be taken to motivate people in Europe to become active European citizens who vote in European elections and make their voices heard in the EU. This will make Europe more important for everyone.

We believe that more places like *the Speakers' Corner* should be created all over the EU to increase the freedom of speech and critical thinking, and to allow people to exchange and debate their diverse views and opinions.

European Cooperation

Unity

We demand that every country which is a part of the EU should have the same laws, taxes, social rights and a united justice system. The EU is to improve the job of „Europol“ and other international criminal prosecution institutions.

We also demand the use of the Euro as common currency in the European Economic Area for better financial cooperation, improvement of the economy and equal living conditions across Europe.

Equality

We demand equal rights and opportunities regardless of the sex, gender identity, sexual orientation and ethnicity of the people. Everyone should be accepted the way they are no matter who they are because we are all humans. As Europeans we have duties towards our fellow citizens, but we also have rights and we have to fight for them.

We demand the EU fights sexual harassment as well as racism. Every individual in the EU should feel safe, listened to and free to have their own opinions as a fundamental basis of the EU motto "unity in diversity".

We demand equal access to free or at least cheaper necessary healthcare, maybe paid by taxes.

Immigration

The structure of European immigration policy isn't understandable enough. We demand a clearer and more efficient immigration policy in the EU. Once voted and decided upon, we need to force the states of the EU to accept those policies.

We demand better living conditions for refugees who have arrived in the EU. After all, all immigrants are humans and deserve the same human rights and humane living conditions like everyone else.

All EU member states should welcome a number of refugees relative to their population size so that there won't be social conflicts because there are too many in one country.
